

Patent Blue V

【IPAT】 Patent Blue V® 2mL/Amp

ATC Code : V04CX

中文名： 拍得藍注射液 «古爾貝特»

適應症： 淋巴管部位的測定、動脈區域之測定。

成份： Each mL contains:

Patent Blue V (Sodium) 25 mg

Sodium Chloride 6 mg

Sodium Phosphate Dodecahydrate 0.5 mg

藥理分類： **Diagnostic agent, Miscellaneous; Contrast Agent.**

用法用量： This medicinal product is for diagnostic use only.

Identification of lymph vessels and arterial territories.

Identification of sentinel lymph nodes before biopsy in patients with operable breast cancer.

Identification of arterial territories:

maximum of 10 mL by intra-arterial injection.

Identification of lymph vessels and sentinel lymph nodes:

1 to 2 mL by subcutaneous route injection around the tumor or around the areola.

There is no specific indication for the use of Patent Blue in children.

不良反應： 最常見的是所謂的發紅反應，局部蕁麻疹和偶爾會發生的嘴唇和眼皮浮腫，特別是浮腫部位會帶淡綠或藍色，那是由於染色素部分停留的緣故。低血壓、噁心、喉頭浮腫，甚至心血管衰竭時此反應會更嚴重。

注意事項： 注射前需了解病患過去有無過敏或不耐反應記錄。
