

Sennoside A+B Calcium

【OSENT】Through® 20mg/Tab

ATC Code : A06AB06

中文名：便通樂膜衣錠 «中美»

適應症：緩解便秘。

成分： Each tab contains:
Sennosides.....20mg
(as Sennoside A-B 12 mg)

藥理分類： **Laxative, Stimulant.**

用法用量： **Administration:** Once-daily doses should be preferentially taken at bedtime.
Administer 2 hours before or after other medications.

Dosage:

Adults & $\geq$ 12 yrs

1-2 tab HS

Children

6-12 yrs, 1/2-1 tab HS;

3-6 yrs, 1/4-1/2 tab HS.

不良反應： 腹痛、腹部絞痛、過敏、噁心、嘔吐。

注意事項： 1.建議空腹時服用。
2.若每日一次，建議於睡前服用。
3.禁用於胃腸道阻塞、腹痛、嘔吐、噁心之患者。
4.會使酸性尿液呈黃、棕色，鹼性尿液呈粉紅或紫紅色；且會使結腸黏膜變黑。
5.若服用後發生持續腹瀉或血便，請停藥並就診。
6.若服用一周後仍無效，請停藥並就診。

懷 孕 期： Agents other than senna are preferred as initial treatment. Stimulant laxatives, including senna, are not recommended for chronic use, but may be used intermittently when needed (*Christie [ACG 2007]*).

授 乳 期： 1.Rhein, an active metabolite of senna, is present in breast milk.
2.The WHO considers use of senna for maternal constipation to be compatible with breastfeeding; however, it should only be used when dietary changes are inadequate (*WHO 2002*).
